

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

Claims 1-29. (Canceled)

Claim 30. (New) A portable apparatus for a health management comprising:
a display device having a pixel portion and a controller which are formed between a pair of substrates;

a sealing material formed between the substrates; and

a body temperature measurement connected to the controller,

wherein the sealing material covers the controller.

Claim 31. (New) A portable apparatus according to claim 30, wherein the display device is a liquid crystal display device.

Claim 32. (New) A portable apparatus according to claim 30, wherein the display device is an EL display device.

Claim 33. (New) A portable apparatus according to claim 30, wherein the portable apparatus further comprises a blood pressure measurement.

Claim 34. (New) A portable apparatus according to claim 30, wherein the portable apparatus further comprises a pulse rate measurement.

Claim 35. (New) A portable apparatus for a health management comprising:

a display device having a pixel portion and a controller which are formed between a pair of substrates;

a sealing material formed between the substrates; and

a body temperature measurement connected to the controller by a lead out cable,
wherein the sealing material covers the controller.

Claim 36. (New) A portable apparatus according to claim 35, wherein the display device is a liquid crystal display device.

Claim 37. (New) A portable apparatus according to claim 35, wherein the display device is an EL display device.

Claim 38. (New) A portable apparatus according to claim 35, wherein the portable apparatus further comprises a blood pressure measurement.

Claim 39. (New) A portable apparatus according to claim 35, wherein the portable apparatus further comprises a pulse rate measurement.

Claim 40. (New) A portable apparatus for a health management comprising:
a display device having a pixel portion and a controller which are formed between a pair of substrates;

a sealing material formed between the substrates; and

a body temperature measurement connected to the controller by an infrared signal,
wherein the sealing material covers the controller.

Claim 41. (New) A portable apparatus according to claim 40, wherein the display device is a liquid crystal display device.

Claim 42. (New) A portable apparatus according to claim 40, wherein the display device is an EL display device.

Claim 43. (New) A portable apparatus according to claim 40, wherein the portable apparatus further comprises a blood pressure measurement.

Claim 44. (New) A portable apparatus according to claim 40, wherein the portable apparatus further comprises a pulse rate measurement.

Claim 45. (New) An active matrix display device comprising:
a first substrate;
a second substrate opposed to the first substrate;
a liquid crystal material formed between the first substrate and the second substrate;
a sealing material formed between the first substrate and the second substrate;
a pixel region comprising a plurality of TFTs formed over the first substrate;
a driver circuit comprising a plurality of TFTs for driving the pixel region, formed over the first substrate; and
a controller for controlling the driver circuit formed over the first substrate,
wherein the sealing material covers the controller.

Claim 46. (New) An active matrix display device according to claim 45, wherein the controller is connected to a body temperature measurement.

Claim 47. (New) An active matrix display device according to claim 45, wherein the controller is connected to a blood pressure measurement.

Claim 48. (New) An active matrix display device according to claim 45, wherein the controller is connected to a pulse rate measurement.

Claim 49. (New) An active matrix display device comprising:
a first substrate;
a second substrate opposed to the first substrate;

a liquid crystal material formed between the first substrate and the second substrate;
a sealing material formed between the first substrate and the second substrate;
a pixel region comprising a plurality of TFTs formed over the first substrate;
a driver circuit comprising a plurality of TFTs for driving the pixel region, formed over the first substrate; and
a CPU formed over the first substrate,
wherein the sealing material covers the CPU.

Claim 50. (New) An active matrix display device according to claim 49, wherein the controller is connected to a body temperature measurement.

Claim 51. (New) An active matrix display device according to claim 49, wherein the controller is connected to a blood pressure measurement.

Claim 52. (New) An active matrix display device according to claim 49, wherein the controller is connected to a pulse rate measurement.
